

BS-310B-1

Vertical speaker stand suitable for various surround sound systems; made of durable metal for strength and safety, ensuring long-term reliability; adjustable width range of 10.5–21 cm to flexibly fit different speaker sizes; minimalist design with easy installation enhances both aesthetics and convenience.

Width Adjustment :

With a telescopic stand design, the speaker placement width can be adjusted to accommodate different speaker sizes.

Cable management hole design for neat and organized wiring.

Foam padding design effectively protects speakers, reducing impact and scratches.

Twist-lock center clutch design allows quick height adjustment with secure fastening.

Round base increases support area and stability, effectively enhancing overall load capacity.
