

# H-10B

Designed for performance, allowing simultaneous play of harmonica and other instruments; wide clamping range up to 5 cm accommodates various harmonicas; sponge and rubber pads prevent slipping and protect the harmonica from scratches; rubber neck support enhances comfort for long-duration performances.

**Standard Size :**

Compatible with various harmonicas to meet diverse needs; easy to install for quick setup; widely applicable, offering greater practicality and versatility.

The neck area is wrapped with rubber material to effectively reduce pressure, enhancing comfort and stability during use.

Minimalist design with clean, crisp lines, presenting a sleek and elegant appearance.

Equipped with a wing nut for easy angle adjustment and secure fixing, ensuring stable and firm structure.

Dual-spring fixation design distributes force evenly for a stable structure; wrapped with soft rubber to prevent slipping and enhance protection.
