

K-302-1B

Straight and boom microphone stand suitable for singing performances and live streaming, offering versatile applications; constructed with thick tubing for enhanced stability and durability; tripod support provides firm and wobble-free performance; lightweight and easy to store, convenient to carry for use anytime, anywhere.

Plastic Boom Adjustment Knob :

Made of durable plastic, lightweight yet sturdy, securely fixes the boom arm position to enhance overall stability; easy and convenient to install, ensuring safe and reliable use.

Durable matte finish resistant to scratches and rust; plastic components offer good texture, balancing lightweight design with practicality.

Optional microphone clip available, with universal size and easy installation, allowing more flexible use.

The panel features a detachable design for easy assembly and disassembly, making it convenient to carry and store.

Tripod base design distributes weight evenly for stable support; must be fully extended during use to ensure structural stability and safety.
