

K-705-1B

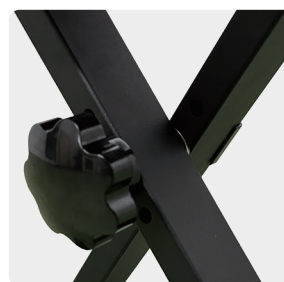

Three-stage height adjustment for flexible adaptation to different needs; quick-install design for effortless and efficient operation; thickened seat cushion with leather surface provides both comfort and durability; quick-release folding structure for compact storage and easy portability.

Quick-Release Mechanism :

Quick installation and removal with a single-sided precision buckle design, ensuring secure and stable locking without loosening.

Made of high-density foam, thick and soft, providing comfortable support even during long sitting periods.

The seat cushion can be flexibly adjusted in height with three fixed levels, accommodating different desk heights and sitting postures.

Foldable design, ready to use right out of the box; compact when folded, easy to store without taking up space.

Constructed with thickened tubing for a sturdy and durable structure, ensuring safer and more reliable load-bearing capacity.
